MOTOR CO.LTD**(72) Inventor: **TAMAOKI KİYOTAKA
ITO HIDEHIRO****(54) OPENING WEATHER STRIP FOR AUTOMOBILE****(57) Abstract:**

PROBLEM TO BE SOLVED: To mount an opening weather strip along a door opening edge of a car body, and improve seal performance between the opening weather strip and the door opening edge and between the opening weather strip and a door.

SOLUTION: This opening weather strip 3 is integrally provided with a trim part 4 mounted in a flange 11 of a door opening edge 1 and a seal part 5 pressed by an external peripheral part of a door 2 when it is closed. The seal part 5 comprises a pair of base end parts 51a, 51b protruded from a side face of the trim part 4 and a seal wall 52 connecting these base end parts 51a, 51b. A side face part 56 of the seal wall 52 press abutting to the door opening edge 1, when the weather strip 3 is mounted, flexes an upper end in doglegged shape, and a connection end 53b to the base end part 51b of the side face part 56 is connected to a side face opposed to the door opening edge 1 of the base end part 53b.
